

SUMMARY

A. K. Singh, Koti N.V.V.Vara Prasad – <i>(F, φ, ω) - Gregus type contraction condition approach to φ-fixed point results in metric spaces</i>	1
Ulagammal.S, Vernold Vivin.J – <i>A Probabilistic Approach on Star Coloring of Degree Splitting Graphs</i>	15
J. E. Palomar Tarancón – <i>Non-Algorithmic Procedures and Algorithm Creation...</i>	19
Mallikarjun G. Shrigan – <i>Subclasses of univalent functions involving Touchard Polynomials</i>	65
A. Dertli and Y. Cengellenmis – <i>The cyclic codes of odd length over the finite ring $R_{u^4, v^2, 2}$ and theirs DNA applications</i>	77
Erhan Pişkin, Nebi Yılmaz – <i>Blow up of solutions for a system of strongly damped Petrovsky equations with variable exponents</i>	87
Mohd Danish Siddiqi – <i>Inspection on Null hypersurfaces of Trans-Para Sasakian Manifolds</i>	101
D. Breaz, T. Groşan, F. Pătrulescu, C. Revnic – <i>Free convection in a square cavity filled by a bidisperse porous medium. Effect of internal heat generation</i> .	117
E. Gavriş – <i>Differential subordinations obtained by using generalized Sălăgean integro-differential operator</i>	127
M. Buyankara and M. Çağlar – <i>On Fekete-Szegő problem for a new subclass of bi-univalent functions defined by Bernoulli polynomials</i>	137
